# Rural Counselors' Network

## Primary Focus:

Increase readiness for college, career (CCR), and life for all students, including growth in academic, career and social-emotional development.

## Goals for Counselors

- *Share resources, information, and tools to support college, career, and life readiness.*
  - This includes contributing to improved quality of and access to the resources already available to counselors. It may also include coordinating and creating a “one stop” site for these resources.
- *Engage in peer collaboration and mentoring to strengthen practice.*
  - Activities include developing a support system, working with peers, deepening our understanding of student options and pathways, and solving problems together.

**We want your participation and feedback! Please complete the meeting evaluation before you leave. It can be found at the following link:**
